DELETE

Public profile & URL

www.linkedin.com/in/ritika-prakash-0840221b3

DELETE STATEMENT IS USED TO REMOVE A SPECIFIC ROW BASED ON CONDITION

Where

- # Removes specific rows from a table based on a WHERE clause condition.

- # Data Manipulation Language (DML) command.

- # Can specify which rows to delete using a WHERE clause.

- # Generally slower than DROP and TRUNCATE because it scans the table data to identify matching rows.

- # Reversible with ROLLBACK if transactions are enabled.

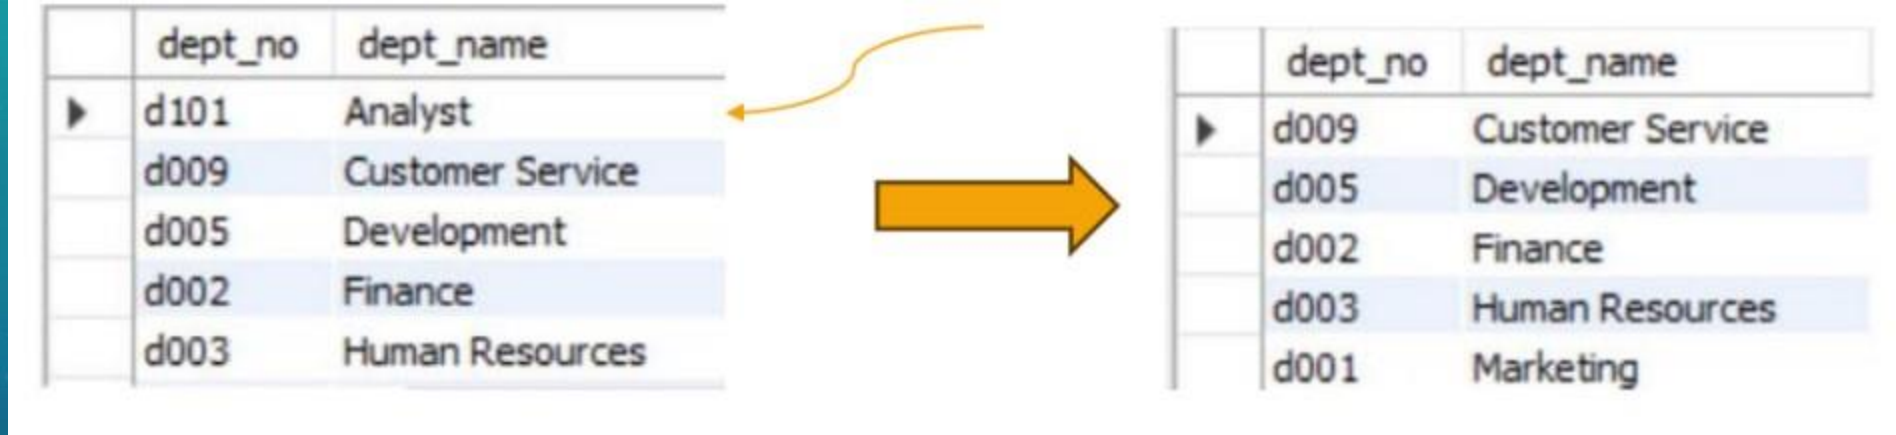

Public profile & URL

www.linkedin.com/in/ritika-prakash-0840221b3

SYNTAX : DELETE FROM TABLE_NAME WHERE CONDITION ;

Example : Delete from departments where dept_no='d101';

dept_no	dept_name
d101	Analyst
d009	Customer Service
d005	Development
d002	Finance
d003	Human Resources

dept_no	dept_name
d009	Customer Service
d005	Development
d002	Finance
d003	Human Resources
d001	Marketing

Before applying 'Delete' statement for the particular table there was a row where dept_no='d101' and dept_name='Analyst' but after applying 'Delete' query, row is not there in the table .

DROP

Public profile & URL

www.linkedin.com/in/ritika-prakash-0840221b3

DROP STATEMENT IS USED TO DELETE ENTIRE TABLE FROM DATABASE

Where

- #Eliminates the entire table structure and its data from the database.
- #Data Definition Language (DDL) command.
- # Faster than DELETE as it directly removes the table structure.
- # Not reversible; once a table is dropped, it's gone unless you have a backup.
- # Use when you want to permanently delete a table that you no longer need.

Public profile & URL

www.linkedin.com/in/ritika-prakash-0840221b3

Syntax : Drop table table_name ;

Example : Drop table departments_dup;';

	dept_no	dept_name
▶	d009	Customer Service
	d005	Development
	d002	Finance
	d003	Human Resources
	d001	Marketing

Error Code: 1146. Table 'employees.departments_dup' doesn't exist 0.016 sec

After applying 'Drop' query table does not exist.

www.linkedin.com/in/ritika-prakash-0840221b3

TRUNCATE

Public profile & URL

www.linkedin.com/in/ritika-prakash-0840221b3

TRUNCATE STATEMENT IS USED TO REMOVE ALL DATA FROM THE PARTICULAR TABLE BUT THE STRUCTURE OF THE TABLE REMAINS SAME

Where

- # Deletes all rows from a table, leaving the table structure intact.
- # Data Definition Language (DDL) command.
- # Fastest option since it deallocates table space without reading row data.
- # Not reversible; all data is permanently removed.
- # Use when you want to quickly delete all data from a table while preserving the structure.

Public profile & URL

www.linkedin.com/in/ritika-prakash-0840221b3

SYNTAX : TRUNCATE TABLE TABLE_NAME ;

Example : Truncate table mamagers_data;

	emp_no	dept_no	from_date	to_date
▶	110022	d001	1985-01-01	1991-10-01
	110039	d001	1991-10-01	9999-01-01
	110085	d002	1985-01-01	1989-12-17
	110114	d002	1989-12-17	9999-01-01
	110183	d003	1985-01-01	1992-03-21

	emp_no	dept_no	from_date	to_date

After applying 'Truncate' query table does is still there but all data are removed.
